

Magnus

AIP Vet-MRI

Designed *exclusively* for animals

Exclusively available from

Animal Imaging Partners

You spoke and we listened.

Introducing the Magnus AIP Vet-MRI

The **Magnus AIP Vet-MRI™** veterinary MRI system was designed exclusively for animals.

The system utilizes our novel magnet design providing superior field homogeneity, large field of view and excellent patient access. Our V-Bloc bed allows for patients to be positioned within the magnet on their back during scanning. The V-Bloc bed along with the large ellipsoidal homogenous field of view provides exceptional spinal cord imaging. Our user-friendly Windows® based software includes optimized protocols for each anatomical site and allows maximum flexibility in customizing clinical protocols and post image processing. The wide range 2D and 3D sequences and imaging techniques, including over-sampling, fast imaging, fat and water suppression, diffusion-weighted imaging and high resolution imaging guarantee superior image quality. The **Magnus AIP Vet-MRI™** is 100% digital, network ready and DICOM®3.0 compatible for remote reading and easy image archiving.

Excellent Patient Access

Wide open design

Large Field of View

Accommodates larger animals

Exceptional Spinal Cord Imaging

V-Bloc bed enables patients to be positioned on their back

Superior Image Quality

Revolutionary fiber optic system reduces noise & improves signal

Diffusion-Weighted Imaging

Improves diagnostic accuracy

Rapid Scan Times

Robust image acceleration due to phased array coils

Superior Image Quality
in a Safe Scanning Environment

AIP Partner Testimonials

"Working with AIP was one of the best decisions I have made as a neurologist. Most importantly, AIP has been very easy to work with."

- Dr. Ronald O. Schueler DVM, DACVIM Westminster, MD

"Jason and the gents are terrific... there are not words to describe how smoothly installation and delivery was for us. They showed up as scheduled, delivered as promised, worked around our staff and contractors, as and when necessary... and quickly and efficiently setup our MR structure and imaging machine. The men consistently demonstrated professional conduct, were polite and courteous, and quite efficiently worked as a team."

- Christy Bell, CPC, LVT Purcellville, VA

Designed *exclusively* for animals

Animal Imaging Partners (AIP) is the leader in veterinary MRI services. The founders of AIP have been involved in MRI since its inception into human medicine in the 1980s. Our company offers veterinary professionals a turn key MRI program that includes the MRI system, R/F room, electronics cabinet, site planning, delivery, installation, training, ongoing support, spare parts, service and maintenance.
